

**Monitor Foam Nozzles
Hydro-Air (ASPIRATING)
Foam Monitor Nozzles
Medium (Not shown) & Big Body**

Description:

Exclusive super-compact, air aspirating foam nozzle with adjustable stream from full fog to straight stream! Has the appearance of a standard fog/straight stream monitor nozzle, yet the "Hydro-Air" venturi provides foam expansion ratios of up to 6:1 by actually inducting air into the center of the master stream. Medium Body Nozzles are available in lightweight anodized aluminum. Standard flow rates from 350 to 1500 gpm at 100 psi. As an option, nozzles can be factory modified to flow from 200 to 1500 gpm at specific inlet pressures.

Big Body "Ranger™" Hydro-Air Nozzle 750-1500 GPM
